Percentage of transfers resulting in twin live births (%)		2 / 16			4.3			
Percentage of transfers resulting in live births (%)		9 / 16			39.1			
Percentage of transfers resulting in pregnancies (%)		10 / 16			43.5			

## CURRENT SERVICES & PROFILE

Current Name: Southern California Reproductive Center

D	Max	O set at is a set of	Maria	0'	Maria	Month and the second difference of	Maria
Donor eggs?	Yes	Gestational carriers?	Yes	Single women?	Yes	Verified lab accreditation?	Yes
Donor embryos?	Yes	Embryo cryopreservation?	Yes	SART member?	Yes	(See Appendix C for details.)	

<sup>a</sup> Reflects features of fresh nondonor cycles. If IVF is less than 100%, the remaining cycles are GIFT, ZIFT, or a combination of these procedures with IVF.

<sup>b</sup> Total patient diagnosis percentages may be greater than 100% because more than one diagnosis can be reported for each ART cycle.

<sup>c</sup> Fractions are used for rates with denominators less than 20. Multiple-infant births (for example, twins) with at least one live infant are counted as one live birth.

<sup>d</sup> Total cycle number includes those using frozen eggs. It excludes 0 cycle(s) evaluating new procedures. Both cycle types are excluded from ART success rates.

<sup>e</sup> In this report, births are defined as term if at least 37 full weeks gestation and normal birth weight if at least 2,500 grams (approximately 5 pounds, 8 ounces). <sup>f</sup> All ages are reported together because previous data show that patient age does not materially affect success with donor eggs.
