## ARKANSAS FERTILITY CENTER LITTLE ROCK FERTILITY CENTER LITTLE ROCK, ARKANSAS

Comparison of success rates across clinics may not be meaningful. Patient medical characteristics and treatment approaches vary (see pages 11-20).

| 2015 ART CYCLE PROFILE |   |      |           | Data | Data verified by Dean M. Moutos, MD |     |                |                  |                       |     |  |
|------------------------|---|------|-----------|------|-------------------------------------|-----|----------------|------------------|-----------------------|-----|--|
|                        | Type of ART and Procedural Factors <sup>a</sup> |      |           |      |                                     | F   | Patient Diagno | sis <sup>b</sup> |                       |     |  |
|                        | IVF   | 100% | With ICSI | 58%  | Tubal factor                        | 16% | Uterine factor | 5%               | Multiple Factors:     |     |  |
|                        | Unstimulated                                    | 0%   | PGD/PGS   | 1%   | Ovulatory dysfunction               | 16% | Male factor    | 29%              | Female factors only   | 7%  |  |

|----------------|-----|--------------------------|-----|---------------|-----|-------------------------------|-----|
| Donor embryos? | Yes | Embryo cryopreservation? | Yes | SART member?  | Yes | (See Appendix C for details.) |     |

a Reflects features of fresh nondonor cycles. If IVF is less than 100%, the remaining cycles are GIFT, ZIFT, or a combination of these procedures with IVF.

b Total patient diagnosis percentages may be greater than 100% because more than one diagnosis can be reported for each ART cycle.

<sup>°</sup> Fractions are used for rates with denominators less than 20. Multiple-infant births (for example, twins) with at least one live infant are counted as one live birth.

d Total cycle number includes those using frozen eggs. It excludes 0 cycle(s) evaluating new procedures. Both cycle types are excluded from ART success rates.

e In this report, births are defined as term if at least 37 full weeks gestation and normal birth weight if at least 2,500 grams (approximately 5 pounds, 8 ounces).

f All ages are reported together because previous data show that patient age does not materially affect success with donor eggs.
