HOUSTON FERTILITY SPECIALISTS HOUSTON, TEXAS

Comparing success rates across clinics may not be meaningful. Patient medical characteristics and treatment approaches vary (see pages 11-21).

| Data verified by George M. Gruffert, MD | 2016 ART CYCLE PROFILE | Data verified by George M. Grunert, MD |
|---|------------------------|--|
|---|------------------------|--|

| Type of ART and Procedural Factors ^a | | | Patient Diagnosis a,b | | | | | | |
|---|------|-----------|-----------------------|----------------------------|-----|----------------|-----|-----------------------|-----|
| IVF | 100% | With ICSI | 75% | Tubal factor | 15% | Uterine factor | 11% | Multiple Factors: | |
| Unstimulated | 0% | PGD/PGS | 66% | Ovulatory dysfunction | 24% | Male factor | 31% | Female factors only | 28% |
| Used gestational carrier | 3% | | | Diminished ovarian reserve | 35% | Other factor | 38% | Female & male factors | 26% |
| | | | | Endometriosis | 17% | Unknown factor | 6% | | |

2016 ART SUCCESS RATES c,d

Total number of cycles: 1,450 (includes 11 cycle[s] using fresh embryos from frozen nondonor eggs)

| | (includes 11 cycle[s] using fresh embryos from frozen nondonor eggs) Age of Patient | | | | | | | |
|--|--|--------|-------|--------|---------------|--|--|--|

^a Excludes cycles evaluating new procedures and banking cycles; unstimulated percentage includes fresh egg cycles only.

b Total patient diagnosis percentages may be greater than 100% because more than one diagnosis can be reported for each ART cycle.

^c Fractions are used for rates with denominators less than 20. Multiple-infant births (for example, twins) with at least one live infant are counted as one live birth.

d Total cycle number and success rates exclude 0 cycle(s) evaluating new procedures. Success rates exclude cycles using fresh embryos from frozen nondonor eggs.

e In this report, births are defined as term if at least 37 full weeks gestation and normal birth weight if at least 2,500 grams (approximately 5 pounds, 8 ounces).

f All ages are reported together because previous data show that patient age does not materially affect success with donor eggs.
